Synopsis

Cryptozoology - the study of creatures, such as the Loch Ness monster, whose existence has not been scientifically proved. Collins English Dictionary. There's something about myths and legends which fascinate us. The Loch Ness Monster, Bigfoot, and The Abominable Snowman - all of these mythical creatures have held our attention for years, and many campfire stories have been the setting of eerie stories containing one or more of these figures. But one story which isn't as widely known is that of El Chupacabra.
