# Gardening In The Shade: Planting The Shaded Garden With Shrubs And Herbaceous Perennials

## Synopsis

This book has been for many years the standard work on a specialized but widespread phase of gardening. Nearly every garden has some shady or partly shady spots which need special treatment; many are in half or more shade, while the woodland garden is almost totally so. City gardens receive limited sunlight because of surrounding buildings. Many indoor gardeners are restricted to those plants which will grow in rooms with little or no light. The new edition of *Gardening in the Shade* has been considerably revised and enlarged and should be more useful than ever to a multitude of gardeners. It includes general cultural information, garden designs of many types, and comprehensive lists of plant material appropriate for all degrees of shade-trees, shrubs, vines and ground covers as well as flowers and even some herbs which will grow in part shade.

## Book Information

Hardcover

Publisher: Charles Scribner's Sons; Revised Ed. edition (January 1, 1962)

ASIN: B0026CKLVS

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #3,059,999 in Books (See Top 100 in Books) #99 in *Books > Crafts, Hobbies & Home > Gardening & Landscape Design > Shade*
