Got this book in order to get my 18 month old daughter interested in coding and computer programming. I know she is too young to know what's going on but she likes playing with the book since it has flaps and such to keep her entertained as I read it to her.

Kids love it so far! They seem to get the concepts in it we'll, it's clear and easy to understand. Very fun to teach as well, my kids are 3 and 5 and were engaged and ask me to keep going. I only cover a few pages at a time so they can retain more, but they request for me to keep going!
