Practical Patient Literacy: The Medagogy Model

Synopsis

Use the Medagogy Model to enhance patient communication and the efficiency of your practice. In this unique guide, Dr. Melissa Stewart explains her patient-centered Medagogy conceptual framework, which tracks the flow of information throughout the patient education process, from information to delivery to action. Not only does the Medagogy model help patients understand their illness and become their own best healthcare advocate, it is the cornerstone of effective multidisciplinary patient education. Dr. Stewart's patient literacy work and her Understanding Personal Perception (UPP) tool were incorporated into the Center for Medicare and Medicaid Services' (CMS) 9th scope of work Care Transitions pilot. The Quality Initiative Organization, which used Dr. Stewart's work in this program, was acknowledged by the CMS with a national award for their outstanding contribution to the field of healthcare.

FEATURES

Unique focus on Medagogy, the author's proven patient literacy model that has reduced patients' readmissions to hospitals and has applied a reliable, robust methodology to individual and interdisciplinary patient literacy efforts

Practical patient orientation clarifies how patients can assert their healthcare goals and knowledge, helping them assume their rightful position in the planning and management of their treatment

In-depth discussion of pedagogy and andragogy—two theoretical frameworks that support human learning strategies and how they can be used to teach different patients and accommodate their particular educational needs

Guidance on how to understand the patient's emotional state and grieving process while receiving healthcare

Handy tools such as the Patient Education Hierarchy, Informational Seasons, the PITS model and the UPP tool that can add direction to individual and/or team patient education efforts

Case studies, numerous illustrations and figures, chapter summaries, and full references

Customer Reviews

Dr. Melissa Stewart is founder and Executive Director of the Organization of Patient Educators. Using her patient-centered Medagogy approach — the conceptual framework discussed in Practical Patient Literacy — she has effectively taught health care professionals how to improve their education and communication techniques. Dr. Stewart is on the faculty at Our Lady of Lake College, and also serves as Director of Education at eQHealth Solutions, the Medicare Quality Organization for Louisiana. She received her Doctorate of Nursing Practice from Case Western Reserve University in Cleveland, and completed her Masters in Education at the University of Louisiana at Lafayette. She is a Registered Nurse and Certified Patient Educator. In 2010, Dr. Stewart authored a resolution making health literacy a major initiative for the American Nurses Association. Dr. Stewart's patient literacy work and her UPP tool were used in a Center of Medicare and Medicaid Services (CMS) pilot program administered by eQHealth. That project resulted in special recognition from the CMS for its leadership role in Care Transitions.

Truly my go-to resource for patient literacy and patient education. Her PITS model of providing patient education used with her UPP tool are truly revolutionary and have demonstrated value many times over. Valuable case examples and end of chapter summaries are an absolute plus. This book should be read by physicians, advanced practice nurses, PAs, RNs, Allied healthcare, and anyone else providing patient education. Patient navigators in the hospital and those working for insurance companies would certainly benefit but ultimately the patient would reap the rewards.

This is a must for nurses and nurse educators. Very informative! We owe it to our patients to obtain this knowledge.

my sister need it , feel good . very good seller . good product with high quality. It's a sharp and a very nice Chef product.
