Nowadays, I can say that hearing loss is common problem that a lot of people are dealing with. A huge number of people are suffering from it today. I guess that Michelle Taylor did great job to write such book. The author successfully mentioned general facts about hearing, hearing loss symptoms, common reactions. Offering several type tests to identify hearing loss, the author gave prevention and necessary surgery on not treatment. I find the conclusion in very positive way with hearing loss recovery success stories that do encourage suffering people. I have never had such type of disease but i like this book because I find these methods beneficial and healing

Total rip-off. Cut and paste job from somewhere that offers zero good information. She promises

advice on improving your hearing and this is what she delivers: "See your doctor" and "get a hearing aid."

what i have realized is that hearing problem is mostly caused by us more than it is a disease and can be prevented. also it can be cured before it creates a permanent damage, to me this book is great coz it helps us retain one of the useful human senses. thanks and keep it up for great staff like that.

The book's title and blurb are totally misleading. You'll learn more on Google. Any educated person already knows the limited information in this pamphlet.

The title gives the impression that it is about curing hearing loss. Not so! This author merely gives an overview of the types of hearing loss and follows the standard progression that any doctor, ENT, or specialist would. There is nothing in here to help you get hearing back or heal your ears. Useless book.

Very easy to understand guide. It contains helpful information regarding hearing loss, symptoms, prevention and treatment.

I just read this book and found it was helpful in understanding the 3 basic types of hearing loss and practical treatments for each. I give this book a 5 star review and recommend this book to anyone looking for information on hearing loss and treatments.

Waste of time and \$3. There are no offers of solutions for getting your hearing back at all! Just an overview of types of hearing loss and what a doctor would do to test. Very short and useless.
