## Customer Reviews

Nice Textbook, dear colleague. But you are TOTALLY WRONG on page 216 showing Ernst Haeckel's drawing of embryos. As I show in my book, good Haeckel made phantasy drawings! But I love your book! Prof Reinhard Renneberg in Hong Kong

Came still in cellophane, new. Just as expected.

Helped me through college, and was in very good condition.

Good

Excellent written text - impressed with the layout!! Easy to understand the major concepts easily!!

Very generic read - this is just a survey course and besides belaboring the nonsense of evolution the book just talks about career possibilities as a biotechnical.
