Customer Reviews

"The course faculty chose this text because we felt that it spoke well to the new graduate nurse. This text gives excellent examples of the importance of leadership and management content from a perspective that is more easily understood when compared to other leadership texts that we considered. Content is clear and understandable. Speaks to the nurse at many levels of the organization. Provides evidence-based support in each chapter. His use of several authors with expertise in the content area heightens the appeal to this text."Tina Saunders, MSN, RN, CNE Kent State University, College of Nursing, Kent, Ohio"Level of material was absolutely right on point. It is extremely readable with definitions and examples provided and is broken up nicely with tables, etc. to clarify topics. There was a great deal of new material regarding collective bargaining, etc. that I had not seen to that extent in other texts. The activities throughout and at the end of chapters would

make this a very instructor friendly text. The grouping at the end of each chapter for web resources was also much appreciated. I enjoyed the real world interviews and evidence-based literature sections very much; believe they could initiate a great deal of class discussion. Again the text was extremely easy to read; flowed well from topic to topic and was thoroughly covered following each heading. The chapter organization was done well. Beginning with the historical background or current background and then moving from theory to actual practice was very viable and students could easily follow and understand. There were many practical on-the-job sections."Jaclynn A. Johnson, RNC-OB, MSN, Otero Junior College

Patricia Kelly is a professor emerita at Purdue University Calumet. She holds a Bachelor's Degree in nursing from DePaul University and a Master's Degree from Loyola University in Chicago. She has taught conferences for the Joint Commission and was the director of quality improvement at the University of Chicago Hospitals and Clinics. She has also authored numerous textbooks and journal articles. She continues to work as a part-time staff nurse in the emergency department and is an active Red Cross disaster relief volunteer.

was a required textbook for class. was helpful resource for papers.

A wealth of information for the class Nursing Leadership. I will continue to refer to this text long after the completion of the course.

The binding is pretty torn up and the first few hundred pages are at serious risk of falling out. I am able to do my homework, but I have to treat the page as if it were an ancient book from the Smithsonian.

The book is falling apart. I've had to tape it a few times already and it looks like I'm going to have to do it again):

I was able to rent this book and I can send it back at the end of the semester so I don't have to store a book I won't ever use again.

Used for Undergrad. Our professor had us use a lot. Although I am not really interested in management as much as I am about becoming a APN.

Got this book for a class, but I can see myself using it after the class to. I feel it is and will be very helpful throughout the nursing profession.

A good read for those wanting to move up and take on more responsibility
