Rosanna Pansino is the creator and host of Nerdy Nummies, the Internetâ™s most popular baking show. She is a Washington native who, upon graduating college, moved to Los Angeles to start her own production company. Pansino launched Nerdy Nummies in late 2011, and the showâ™s audience grew very quickly. Her videos have been viewed more than one billion timesâ™making Rosanna one of the most-watched personalities on YouTube. The Nerdy Nummies CookbookÂ is her first book.

Very cute book, awesome ideas. Be careful when you bake the chocolate chip cookies, there is a misprint. Ours came out VERY salty and after watching Ro's video, we realized the book calls for salted butter and 2 teaspoons baking soda (it should be 1 teaspoon according to the video and the butter was not specified so maybe try unsalted butter).

I wasn't sure what I was getting myself into when I bought the Kindle version of the book. Based on looking at some screenshots and reading reviews, I thought I would only see clips of images from Ro's videos. I'm glad the book blew me away! There were a lot of designs that I haven't seen before...especially _____ ones!!! (sorry, I won't spoil it for you). It is definitely worth getting it. If you are a fan of baking, decorating sweets, and love art in general, you should get this book. :)

My daughter just bought this for herself. She's 9 and a big fan of Nerdy Nummies. I'm not gonna lie, I watch it with her. I love that the book has how to pictures for every recipe. I also love that she shows some basic decorating techniques and also some basic recipes such as sugar cookie dough, white cake, etc in addition to the very creative recipes she has. The book itself is very sturdy and feels very well made. I can't wait to sit down with my daughter tonight and decide what we're going to try first. I'm betting it will be the emoticon cookies!

Love this! I became a big fan of Ro's and I wanted an easier way to do recipes at home. Personally, I like the more pop culture related items and this book has more space, science and math themes and that is the only reason it didn't get the 5th star from me. Otherwise, everything I expected and enjoy from the YouTube videos.

I got this item for my son, he looooves cooking and he looooves nerdy nummies show. The picture attached to this is a cake that he got from the book. My other son on his birthday He wanted to have

a brain cake, he is a big fan of zombies and stuff. So that was the first time my oldest got to use his book. This book is amazing for kids, it is very fun and she made it so it's very easy. It's got a lot of fun stuff to make in it. I would recommend this book if you have a child that loves cooking. By the way I bought this book full price and I did not get compensated by doing this review, I just like to share cause I'm not sure how many of you heard about this book...and she does have you tube channel that my kids are obsess of.

Nothing in it is a licensed sort of theme. There's things like sugar gems for "rupees" but they can't call them rupees. Not very much baking, honestly. It's mostly candy and things, which if that is what you're into, go for it. I don't think it's really worth the money when you can just watch the show and make/see sweets from shows/games/movies you recognize.

I just got this book and have already tried four recipes. I LOVE her Internet show and LOVE this book just as much. I collect cookbooks and one of the things I like best is good Pictures and this book has them, lots of them! The instructions are clear and she gives lots of tips and tricks. I enjoyed all the nerdy facts included with each recipe. Every recipe I made came out wonderful and the recipe was easy to follow. I cannot wait until she comes out with her next book. This would make the best gift for the nerdy cook in your life.

I came across this cookbook at the Great Lakes Science Center in Cleveland and it was twice the price, \$30 plus tax. As much as I loved it, I didn't have the money considering my kids wanted a shirt and other stuff. So I came to and found it for 1/2 the price, the same exact book and was thrilled! I LOVE this book. Having two boys who love science and other nerdy things, I had to get it. We also love to bake and this was the perfect fit of a cookbook in my house. I have a lot of other cookbooks but what made this different is that it does have some really cool ideas relating to everything geeky. My kids are picking out what they want to make. While at a Boy Scout meeting (geeky for sure!) another mother caught a glimpse of the book and had to ask where I got it. She loved it and was going to look at buying one of her own. We always try to make our own creations for birthday parties, etc. and not buy a pre-made treat so this book is right up our alley. The book is hardcover and loaded with high quality photos. detailed directions and so much more. I highly recommend this book. We all have a little geek in us!
