Maternal-Neonatal Facts Made Incredibly Quick! (Incredibly Easy! Series®)

Synopsis

Fully updated and now in full-color throughout, *Maternal-Neonatal Facts Made Incredibly Quick! Second Edition* is the perfect point-of-care reference for nurses working with pregnant patients in any clinical setting. This pocket-sized book provides instant access to information nurses need quickly every day on all aspects of prenatal, intrapartum, postpartum, and neonatal care. The book includes a section on ECG interpretation, the most up-to-date ACLS guidelines, a glossary of common terms, conversion charts, and over 125 quick-reference charts and illustrations. Colored tabs help nurses find information quickly. The wipeable page surface allows nurses to write notes and remove them easily.

Customer Reviews

This is a great addition for any RN working in Maternal-Neonatal Medicine. The indexed tabs make finding information lighting fast. The pages are a plastic vinyl and make this spiral bound book extremely durable!

I really enjoy these Maternal-Neonatal Fact cards. They are helpful reminders, or would be good for a nursing student studying.

Very helpful resource for clinicals.

Definitely exceeded my expectations.. Not only does this book include "must-knows" as far as lab values and other essentials, but teaching points for your patients. Excellent choice if you're looking for a reference chart to put in your nursing bag!

Since we can't bring huge books to clinical, this is great to have especially when you're making assessments and need to recheck something really quick. Illustrations are great, such as ROA, LOA; you don't have to visualize the position because it's all there!

Purchased this for the RNC-NIC review. Was helpful...more in practice than for the test, though. Lots of good information for NICU nurses.

Wonderful!!!

Rely helped me in class
