# Secret Coders: Secrets & Sequences

## Synopsis

The third book in the Secret Coders series from Gene Luen Yang and Mike Holmes. Stately Academy is no ordinary school: it was once home to an elite institute where teachers, students, and robots worked together to unravel the mysteries of coding. Hopper, Eni, and Josh won't rest until they've learned the whole story, but they aren't the only ones interested in the school's past. Principal Dean is hot on their trail, demanding that the coders turn over their most powerful robot. Dean may be a creep, but he's nothing compared to the guy who's really in charge: a green-skinned coding genius named Professor One-Zero.

## Customer Reviews

"Nearly every element (especially the bad guys) escalates wildly and successfully in this nifty comp-sci romp." [Kirkus](#) "In this installment, the problems Eni, Hopper, and Josh [face](#) and, in turn, the reader [is](#) called on to solve have become more complex, but the explanations and crystal-clear illustrations make them very comprehensible."

Gene Luen Yang is the National Ambassador for Young People's Literature. He has written and drawn many graphic novels, including American Born Chinese, which was a National Book Award finalist, as well as the winner of the Printz Award and an Eisner Award. His graphic novel set Boxers and Saints won the Los Angeles Times Book Prize. He has also written for the hit comics Avatar: The Last Airbender and Superman. Mike Holmes has drawn for the comics series Bravest Warriors, Adventure Time, Secret Coders, and the viral art project Mikenesses. His books include the True Story collection, This American Drive, and Shenanigans. He lives with a cat named Ella, who is his best buddy.

Though I haven't read it personally yet, within less than 24 hours of the release, four of my fourth graders have read the copy of the book I got yesterday afternoon, and have all expressed that they've loved the book and are excited for the fourth book (I'll edit this later when it eventually makes its way through the rest of my class and I can read it!).

My daughter is addicted to this series. As a tech pro, I love how it teaches computing and math in a fun and accessible way.

My 8 year old son devoured all three Secret Coders books in 2 days - I don't know how he's going to wait til October for the 4th one!

Both my 8 and 11 year old grandsons couldn't put the series down until they were done with all three!!!
