DNA Of The Gods: The Anunnaki Creation Of Eve And The Alien Battle For Humanity

Synopsis

An in-depth study of humanity's Anunnaki origins and the Anunnaki battle for an intelligent versus enslaved humanity

Explains the genetic engineering of humanity by an Anunnaki scientist Ninmah

Shows how the concepts of sin and the inferiority of women arose from Enlil's will to keep humanity underdeveloped, clashing with Enki's and Ninmah's plan to make us equal in intelligence

Reveals how humanity's long history of conflict was shaped by the battle between Enki and his brother Enlil

Further developing the revolutionary work of Zecharia Sitchin, Chris Hardy shows that the "gods" of ancient myth, visitors from the planet Nibiru, created us using their own "divine" DNA--first through DNA extraction from their own ribs' marrow and later by direct relations with early human females. Drawing upon multiple sacred texts, Hardy details the genetic engineering of humanity by Anunnaki scientist Ninmah, with the help of Enki and Hermes. She reveals how Ninmah's first female human creation, Tiamat/Eve, contained more alien DNA than the earlier male one, Adamu, and how the biblical Noah represents the perfection of her work. Examining the war between Anunnaki brothers Enki and Enlil, Hardy reveals how the concepts of sin and the inferiority of women were born out of Enlil's attempts to enslave and then wipe out humanity, repeatedly thwarted by Enki and Ninmah. The author further explains how the sacred sexuality taught to humans--still seen in Tantric practice--became suppressed millennia later by the patriarchal concept of original sin and how innocent Eve took the blame for the expulsion from Eden and fall from Grace. Showing that the god who created us was not the same god who expelled us from Eden, Hardy explains that there will be no apocalypse because the Good/Evil duality has never truly existed--it has been only enemy gods fighting and implicating humanity in the wake of their own competition for power. With a full psychological understanding of how the ancient "gods" have shaped humanity's ongoing history of conflict, we can move beyond the framework of "(my) Good versus (your) Evil" imposed by Enlil and begin to steer our own planetary destiny.

Customer Reviews

“In this thought-provoking and remarkable book, Chris Hardy illustrates the way the role of women in societal development has been marginalized in modern times. She uses ancient mythological accounts that demonstrate that a more equitable and more feminist approach was once in vogue but was eclipsed when male-dominated writers co-opted recorded history. Hardy couples this well-founded assertion with the provocative suggestion that human evolution was given a jumpstart by extraterrestrial agencies. Readers may agree or disagree with Hardy, but they will never be bored as they wend their way through DNA of the Gods.” (Stanley Krippner, Ph.D., coauthor of *Personal Mythology* and *Becoming Psychic*)

“Excellent researched and easy to read, this book honors the work of Zecharia Sitchin with updated science and philosophies proving ancient man was genetically manipulated by an alien hand.” (Xaviant Haze, author of *Aliens in Ancient Egypt* and coauthor of *The Suppressed History of America*)

“Some of the strangest theories are also the most fascinating, especially if they involve human nature and deep mysteries from the ancient past. Anyone who thinks they really understand reality doesn’t have a clue. Enjoy this thoughtful and creative exploration of human origins and what it is to be us.” (Allan Leslie Combs, Ph.D., doshi professor of consciousness studies and director at CIIS Center for)

“We need writers like Chris Hardy to give us space to think beyond the pale; to draw us into the unknown and challenge our assumptions. To read her work is to realize how mundane the life of the mind may be for the rest of us who may not be brave enough to explore the meaning of our ancient dreams. She is chasing the shadows of our humanity and for that we can be grateful.” (Linda F. Dennard, Ph.D., professor of public policy and international relations at Auburn University)

Chris H. Hardy, Ph.D., holds a doctorate in ethno-psychology. A cognitive scientist and former researcher at Princeton’s Psychophysical Research Laboratories, she has spent many

years investigating nonlocal consciousness through systems theory, chaos theory, and her own Semantic Fields Theory. The author of many research papers and published books, including *The Sacred Network*, she lives in France.

Intriguing! Profound! This book takes Zecharia Sitchin's translations of the Sumerian, Babylonian, and Akkadian tablets and the writings of the early Egyptians and Greeks as a base and goes forward with these stories, comparing them with the Bible writings and modern religions. The psychology, sociology, and intentions of the Anunnaki gods is explained thoroughly. To understand our human selves we must understand our Anunnaki ancestors for we are their direct descendants. This book probes the Grand Design and our part in it. You won't be able to put it down - truly consciousness raising. VERY HIGHLY RECOMMENDED - AAA+++ Lorraine Salvin

I was impressed and educated by this book. Yes, there were some non-five-star elements to it, but overall, it was a great read. I've been hard-pressed to accept Sitchin's version of Sumerian events at our human origins, but Chris Hardy has managed to change my view. I'm still skeptical, but much less so. The version of events put forth in this book are more plausible to me than any other account I've heard, especially the Bible's. We hack dna - we are slaves to money, society, and the system - is it so implausible that somebody hacked our dna, made slaves of us? And then, when we got smart enough to want to be treated better, abused us and piled blame and shame on our heads, keeping us spinning in perversity beyond our comprehension so that we might remain forever enslaved? Except, as Hedges says, we've already surpassed our progenitors and masters. Armageddon will not happen, because the premise is wrong. It's not Good vs. Evil, it's two brothers fighting, with one of them being quite delusional and cruel - the one posing as the good one. Yes, it's presented clearly with enough foundation for me to buy it, especially because it makes sense intuitively. To the person who called the work 'narcissistic' - that's the wrong word. Chris Hardy is a person who is fully aware of her intellectual and spiritual power - a non-apologist, demonstrating through her writing the very truths she hashes out. I love all the thought-experiments - every loose end that I can think of has been handled, and many of her thought experiments were the same as mine, with the same conclusions. The only argument I have is with her description of attainments - various samadhis related to chakras, etc - some of the part around her spiritual accomplishment is both self-congratulatory (it's hard to be matter-of-fact about one's attainment, I suppose), and not 100% correct - the thousand-petal-lotus at the crown chakra may be the transcendental point, but the heart-mind bindu at the heart center is the true jewel in the lotus, and she never mentions it.

Everything else she said, all the way down to developing critical thinking in addition to samadhi, is spot on. Hurray for this book!

I think that a lot of people struggle with the conflicting stories of creation, and the various timelines of ancient civilizations around the globe. This book attempts to unify those stories into one cohesive framework, and does so convincingly. It's a great read!

I had previously given an undeserved poor one-star rating on this author primarily because of her feminist ranting throughout her writings. I have elected to read Chris Hardy's work a 2nd time, and with a more open mind toward her feminist overtones, and now can more objectively give the author a much higher and deserving recommendation. For those of us who adore the works of Zecharia Sitchin, may not find anything earth shattering, as Chris Hardy supports the investigative works of Sitchin. However, this was an enjoyable and informative read for me, in reviewing the varied enfaces Chris Hardy had placed on the subject matter. I could highly recommend this book to a reader who is being introduced into alternative histories, before jumping into the deep-end of the pool with Sitchin's works.

There seems to be more and more evidence emerging that substantiates the ancient Sumerian writings about how the Anunnaki gods figure into our DNA - how sad that the three religions of "The Book" (the Bible) reject this evidence out of a fear of losing their sacred positions of interpreting the "Word of God" - this book is written from a woman's perspective and brings into the light the antiquated belief that the female is at the root of evil in the world - I recommend this book to all open-minded males

Okay, but a bit too much beside the facts on the author's mind. Her attempts at analyzing the Anummaki didn't all ring true with me, but then again, I have been spoiled by reading too much Sitchin.

Read this book to get an insight on how humanity has been bamboozled regarding organized religion...all organized religion!

Dr. Hardy has taken various sources of our historical and hidden past and brought in the Divine Feminine aspect to tie it all together in a new way. She examines our past and the manipulation of

our DNA and also the role of our Divine Creatrix..yes, it was a woman geneticist. Bravo.
