Skylar Moore is used to talking her way out of murky trouble. When her gambling father gets into trouble with the wrong people, Skylar is again dragged into the mess and her only option is to move thousands of miles away from Miami to escape. But has she moved far enough away? Liam Conway is a billionaire that has made his fortune by leaving his pack years ago, and living by his own rules. He has returned to Boulder Junction at the request of his father. The only reason he has is to be close to his ailing mother. He now runs his business from the small town and is being pressured by his father to be prepared to take over as Alpha soon. An unknown hunter enters Boulder Junction and Liam's number one priority is seeking revenge against the werewolves that have murdered his father. How will Liam protect the pack while maintaining his billionaire identity? Great story. Can't wait to read the next one in the series.

I liked this story. Skylar, human, is looking for a new life way far away from her home in Miami. Her deadbeat father has dragged her into his drama once more and bad people are after her. Liam, next in line to be alpha of his pack, is looking for a male personal assistant. He allowed his housekeeper, Farah, to handle the ad and responses. Boy, was he surprised when Skylar showed up. Things just get better from here. Between Liam's father and brother (both real jerks) and the hunter, Cayden, starting trouble the action doesn't stop. I really liked when Liam's little brother, Michael, first meets Skylar. She freaks a bit when she opens her eyes, face to face with a wolf on his belly so he starts licking her face. I do agree with another reader that Liam's father and brother both got what they deserved. This story is exciting, funny and romantic, with danger throughout.

I made it about a third of the way through and I have encountered just too many grammatical errors to continue.

I enjoyed this book but would have loved to been more of each story. You have witches, shifters and vampires. Some romance in small doses. Overall the characters are good the plots are good just not much of endings in any of the stories

What a great start to a new and exciting series! Skylar Moore is on the run because of her deadbeat dad and is now working as billionaire businessman, Liam Conway. I won't spill any more, just know I loved reading the story, and can't wait to see what happens in The Alpha's Demand!

This is the first book that I have read from this author and I like her take on the paranormal world. Liam is a self made billionaire who left his pack to find his own way. He isn't happy about the way his father, the alpha, treats his family and the pack. His mother's health is deteriorating and her wish is for her family to be together. This is the main reason Liam returned to Boulder Junction but his father is putting him under pressure to take over the role of alpha. Something that he really doesn't want to do. He likes his solitary life. Sky has just graduated after losing her mother fairly recently, and she has to pay the medical bills. She doesn't have a job and her father who is a gambler owes money to a dangerous mob. They are now aware of her existence and are expecting her to pay his debts. Being aware that she is being followed she applies for a job which lands her in Boulder Junction. Far enough from the danger! Liam is surprised when Sky lands on his doorstep. It goes against his job advert but reluctantly gives her the job on a trial basis. They are attracted to each other but Liam can't take the risk of revealing his true nature and Sky isn't willing to share her own secrets. Cayden is a born hunter, out for revenge. He is in Boulder Junction to avenge his father and when he meets Sky, he can't deny his attraction for her either. This only complicate matters. Sky knows where her heart lies but are the feelings mutual? On top of everything else, she is still in danger. This short story is the first part of a series. It's a great concept with interesting characters. There are some errors which interfere with the flow, otherwise quite an engaging read.

I really enjoyed this book. It has wolf shifters, a witch, a romance and some action thrown in. Liam Conway a rich recluse is also a wolf shifter, who walked away from his pack not wanting to take up the rule of alpha when the time come. But then his mother gets ill so he moves back to the local town to be near her but not to the shifters village. Skylar Moore a human was brought up by her mother her father being being a drunk and gambler. Then her mother gets ill and dies leaving Skylar was all the medical bill. Her father's also back in the picture having run up huge debt gambling he's been kidnapped by the people he owes money to and has given them Skylar's info, which leads to her getting a call asking for the money or her dad will die, and he's still her dad. Skylar obviously doesn't have the money but offers to pay installments as long as they don't hurt her dad, which

leads to Skyla applying for a job as an assistant to Liam Conway and lying on her application. She persuades Liam to give her a week's trial.. Cayden Benet a cop and hunter also moves into the town about the same time looking for revenge on the wolf shifter who killed his father. Cayden and Skyla strike up a friendship - if you want to know anymore you're just going to have to read the book, as I hate when reviewers write too much and spoil the story for other readers.
