âœArendtâ™s admirers will welcome her excursion into the relatively neglected field of comparative revolution. She is never dull, enormously erudite, always imaginative, original and full of insights.â•â "The Sunday Times (London)

Hannah ArendtÂ (1906â“1975) was University Professor of political philosophy in the graduate Faculty of the New School for Social Research, a visiting professor at several universities including California, Princeton, Columbia, and Chicago, a research director of the Conference on Jewish

Relations, the chief editor of Schocken Books, and the executive director of Jewish Cultural Reconstruction in New York City. She was awarded a Guggenheim Fellowship in 1952, and an Arts and Letters Grant of the National Institute of Arts and Letters in 1954. She is also the author of *Between Past and Future* and *Eichmann in Jerusalem*, which are available from Penguin Classics along with *The Portable Hannah Arendt*. Jonathan Schell (1943–2014) was the Lannan Fellow at the Nation Institute. He is the author of *The Unconquerable World: Power, Nonviolence, and the Will of the People* and *The Fate of the Earth*, among other books.

Arendt asks why the US Revolution was so successful compared to the French Revolution and many subsequent revolutions. To answer this question she examines both the contrasting historical experiences of the two countries and how their leaders drew on different aspects of Enlightenment philosophy to formulate and justify their actions. In the American case the people were more or less equal and free by virtue of landholdings. In addition they had extensive experience in self government from township councils on up to the colonial legislatures. This all began with the most primordial of social contracts, the *Mayflower Compact*, the ultimate forerunner of the US Constitution. The most influential philosopher for the *Founding Fathers* was Montesquieu, who emphasized checks and balances to create a stable and enduring government, one that could not be taken over and ruined by one faction or another. In contrast the French experience was entirely top-down, with the vast majority of people living in poverty and misery as part of the *third estate* -- subject to control and exploitation by the aristocratic elites of the *first estate*. The *people* or *masses* were desperate for liberation from their misery, a situation that Arendt calls the *social question* or a matter of *historical necessity*. Yet they did not know how to govern themselves or better their economic condition in the short run. In today's terminology, the system was totally rigged against them. They could break out of their prison-like condition after the storming of the Bastille, but then what? The self-appointed leaders of the French Revolution, like Robespierre, were equally at a loss when it came to practical actions. They sought to identify and embody the *will of the people* and then to create a top-down rule of their own in order to implement this will. But they quickly discovered that just writing a constitution and proclaiming the hegemony of their new regime didn't actually make anything happen -- they themselves lacked legitimacy and in any case did not have access to the real levers of power, except terror. Strangely, Arendt never discusses the issue of the ownership of land. Instead she identifies their philosopher as Rousseau, who idolized people in the

Ã¢Âœstate of natureÃ¢Â•, uncorrupted by high society. But the reality was that these demagogues were far better equipped to take revenge, as in the Jacobin Terror, than to create a just social and economic order. The one principle of Ã¢ÂœrepublicanÃ¢Â• government that Robespierre, and later Lenin, refused to recognize or accept was the spontaneous formation of self-governing Ã¢ÂœcouncilsÃ¢Â• that begins automatically after an old regime collapses. Instead they were brutally suppressed in order to gain dictatorial control. Later in the US, Thomas Jefferson saw a need to revive the old revolutionary spirit, advocating a division of the country into local districts, or wards, where people could debate and decide face to face on issues from local to national, as in New England town meetings. Other post-revolutionary issues discussed by Arendt include corruption, political parties, representative government, and federalism. For example, she characterizes the operation of political parties in representative government as Ã¢Âœgovernment of the people by an elite sprung from the peopleÃ¢Â• (p. 269). But she pays scant attention to the underlying economic issues, nor to the eventual success of the French Revolution in leading the way toward a new political order, via a long trial and error process of "creative destruction". My favorite quote is Ã¢ÂœFreedom in a positive sense is possible only among equalsÃ¢Â• (p. 267), which leads to the conundrum Ã¢Âœhow to reconcile equality with authorityÃ¢Â• (p. 270).

I love the actual book but my book arrived damaged and the margins are all wrong. The page number is missing on some pages because of how inconsistent the margins are. I dont know who to blame? ? Penguin Classics?

Great copy. Perfect for writing notes in the margins!

One of the best books on politics of the twentieth century, and a rhetorical masterpiece. Required reading for those who want to know the true natures of power and freedom.

A must read!

Bought as a gift.

Excellent book with a clear explanation of the origins of revolutionary movements, and its causes; it is a necessary book to understand and analys current so csll revolutionary movements as the Arab spring; Venezuela, etc.

This book is hard to read, but it is very useful in understanding the difference between French and American Revolution as well as the politic realm in our present time
