The guidelines for ACLS were revised in 2015, so this book no longer has all the information needed for ACLS certification.

This is the 2010 version and the new version came out in 2015. How they can still rent this out is beyond me! I couldn't even do the pretest because the code in the front of the book didn't work.

Sent me the wrong year so useless to me and cost me and hassle to send back. Don't rent outdated books that is really taking advantage of people's knowledge deficit and is confusing as what should be studied prior to taking and ACLS class.

Beware this is an old edition and not current for 2015 guidelines. The access code for online self test does not work and the new content for testing by AHA is not included. I was not allowed to use this book for certification as it did not have the new updated content. Be sure you are receiving the newest version available. AHA comes out with new standards approx. every 2 years.

The textbook entitled "Advanced Cardiovascular Life Support: Provider Manual" is the definitive advanced resuscitation resource for a wide variety of healthcare professionals. It is exceedingly well-written, well-organized, and well-illustrated, and I give it my highest recommendation.

Everything I needed!

Outdated.

THIS BOOK IS/WAS OBSOLETE.

Thanks!!
