I am not sure how one can fall asleep when the person on the tape spends a good deal of the time explaining why we have a hard time falling asleep. Personally I like soft music, I found it annoying more than helpful.

very good - I fall asleep in minutes and wake up feeling great

It helps. It usually puts me to sleep in no time at all.Gloria

Love, love, love this. I use it so often, when I wake up and can't sleep at night. HIGHLY recommend it!

Effective. Simple. Background music helps a lot

This is the second CD I purchased by the same author. I use this one every night. I have a few CDs by different authors that I listen to. I have downloaded them to my cell phone and I play them all night long every night. Her voice is so soothing that I go within myself to do a deep relaxation of my whole body. If I wake up her voice eases me back into sleep. Nancy uses a mix of ways to guide me into relaxing my whole body. She helps me calm my overactive mind, release stress and emotions with guided imagery, deep breathing techniques and positive affirmations. This is a 60 minute CD designed to you can listen to it in a sequential flow or you can choose a favorite section to facilitate deep relaxation and sleep. I personally listen to the whole CD every night. This CD is one of the few ways I can shut down my mind and relax my whole body at night so I can sleep. Everybody needs and deserves a good night's sleep; some of us have to work a little harder to get the much needed sleep. This CD helps us along the way and smoothes the trip into deep sleep. She includes an in-depth 16 page booklet with simple effective suggestions on how to sleep. I received this product at a discount or free for an honest and unbiased feedback.

Insomnia Stinks! I can feel myself going to sleep, my eyes start closing and then I remember something I need to do, something I am worried about and that opportunity to sleep just seems to flutter away and I am met with frustration with further impeded my ability to sleep. I hate to admit that I a retired therapist and actually used to teach people these methods of relaxation. I could focus myself and be asleep easily in ten minutes but like any skill if you don't keep them sharp they fade away. This DVD has been effective at helping me rehone my skills to relax and allow myself to

sleep. I use the deep relaxation section as it takes us through muscle group by muscle group to help us relax. This helps me focus. By hearing her voice I can keep my attention on her. I would say to folks and like anything else this takes work. If you find your mind wandering initially, don't worry about it, just refocus and return to the process and each day will get a little better. The voice and the music are the keys to good relaxation assets and this has both. I really like this and it has been beneficial for me. The sleep healing story is helpful as are the tips to good sleep habits. I received this product at a discount for my fair and honest review. I have done exactly that. I will recommend this to friends and family and actually bought another one for my son.

I was amazed at how well this worked after suffering from insomnia for a long time. In concert with some changes in diet and exercise (which the booklet suggested, and I had already made changes, such as no caffeine daily and no food after 9 p.m.), this CD has an hour of tracks (voice and music, and just music) of varying length, which I mixed and matched, as the booklet suggested, to create different playlists that gave me varying lengths to listen to at bedtime. For variation, I also have used "Relaxation/Affirmation Techniques" and the techniques on this one for my daughter: "Relax Quick!: Simple, Effective Relaxation Processes You Can Do in Moments...Anytime, Anywhere!". What I liked about the CDs overall is the research that went into the methods. After lots of research on the Internet, I found that the Deep, Healing Sleep CD and the others in her series compile in one place the many techniques that are recommended and found individually elsewhere. But here they are, all in one place.
