Stewart's Clinical Removable Partial Prosthodontics (Phoenix, Stewart's Clinical Removable Partial Prosthodontics)

Synopsis

The fourth edition of this classic prosthodontic textbook features a new chapter on implant-assisted removable partial dentures as well as a description of the Prosthodontic Diagnostic Index. As before, the text provides an overview of removable partial denture service in contemporary dental practice with an emphasis on clinical and design aspects. Clinical topics range from examination and treatment planning to mouth preparation and prosthesis placement. Common design philosophies are discussed, and a step-by-step method for partial denture design is presented. Also included are alternative removable partial denture therapies such as Swing Lock, dual path, and attachment-type prostheses. To facilitate visualization and understanding, the text is accompanied by numerous illustrations. Like those that came before it, this edition is intended to help the student, the general practitioner, and the specialist consistently provide high-quality prosthodontic treatment for their patients.

Customer Reviews

This text will prove to be a much referred-to resource for removable partial prosthodontics. It is appropriate reading for anyone involved in the field, from novice to seasoned practitioner. --William J. Maloney, DDS, - The New York State Dental Journal, January 2009

This is a classical book and a must have in your library.

Very detailed & informative .covers every aspect of prosthodontics.I recommend reading a preclinical manual prior to this .

One of the best books I've read on this topic. Abundant color photos very helpful in getting concepts across to reader.

This book has a very practical approach to RPD construction. The many illustrations make the subject extremely comprehensible. It makes a good reference in dentist's professional library and very helpful to new graduates.

Great book written by three excellent and experienced practitioners.

Really good book only gives u the basics

Really worth the investment!
